

De Beers Group Ignite DiamondSure

Overview

DiamondSure is a portable desktop diamond verification instrument for loose and mounted stones, designed to separate diamonds from laboratory grown diamonds. DiamondSure is manually operated but gives an automatic test result.

The instrument tests individual stones and automatically displays one of the following results:

- i) Pass
- 2) Pass (check with thermal pen)
- 3) Refer for further tests
- 4) Refer for further tests (type Ib component)
- 5) Refer for further tests (type II)
- 6) Refer for further tests (possible type IaB)
- 7) Refer (test for moissanite)

The 'Refer' results may include natural diamonds, synthetic diamonds and diamond simulants. These should be further tested for full verification.

Stone Testing Capabilities

Weight range:	0.05 ct to 10 ct
Colour range:	D to J*
Stone shape:	All
Diamond simulants:	Yes
Mounted stones:	No

* failsafe across all colours although natural fancy colours will give a higher referral rate.

Instrument Capabilities

Automated feed:	No
Automated results:	Yes
Automated dispense:	No
Detect or Refer (synthetic diamonds):	Refer
Detect or Refer (diamond simulants):	Refer
Multiple stones at once:	No
Training required:	No

ASSURE 2.0 Performance

Key ASSURE 2.0 test results for the DiamondSure:

	Primary Sample	Smalls Sample	Jewellery Sample
Diamond False Positive Rate (Optimal rate 0%)	0.0% +/- 0.0%	N/A	N/A
Diamond Referral Rate (Optimal rate 0%)	5.3% +/- 0.0%	N/A	N/A
Diamond Accuracy Rate (Optimal rate 100%)	94.7% +/- 0.4%	N/A	N/A
Test Speed (Stones per hour)	203 +/- 5		

Notes:

Uncertainty ranges (+/-) are based on repeatability testing (three trials) and represent spread of results in absolute terms.
Test Speed includes time taken to place the samples on the instrument and to interpret the results.

Instrument Specifications

	17 cm (W) x 26 cm (D) x 10 cm (H)
	3.5 kg

Price: 9,500 USD (Jul 2026)
